Claude's Func-Localization Trajectory (7 steps)

[#0] planning (planning) & repo-discovery (check-dir)
run: find /workspace/open-mmlab__mmdeploy__eed69b14 -type f -n...

[#1] file-locate (keyword-search) & line-locate (infile-keyword-search)
run: grep -r "def " --include="*.py" /workspace/open

Output: 20+ Files

[#2] file-locate (keyword-search) & line-locate (infile-keyword-search)
run: grep -r "node" --include="*.py" /workspace/open-mmlab__mm...

Output: 6 Files

[#3] line-locate (file-reading)
read: core/optimizers/function_marker.py

[#4] solution-implementation (initial-solution)
edit: core/optimizers/function_marker.py.

[#5] solution-verification (code-search)
run: grep -r "import mmdeploy.core.optimizers.function_marker"...

[#6] solution-verification (reasoning)
think: Now I have a good understanding of the function. The `m...

Qwen32B's Func-Localization Trajectory (4 steps)

[#0] file-locate (keyword-search) & line-locate (infile-keyword-search)

run: grep -rnw '/workspace/open-mmlab__mmdeploy__eed69b14' -e ...

Output: 1771 Files

[#1] file-locate (keyword-search) & line-locate (infile-keyword-search)

run: grep -rnw '/workspace/open-mmlab__mmdeploy__eed69b14' -e ...

Output: 105 Files

[#2] line-locate (file-reading)

read: core/optimizers/function_marker.py

[#3] solution-implementation (initial-solution)

edit: core/optimizers/function_marker.py.
